

APS Rate Changes

As part of the 2017 APS Rate Case, all APS customers – solar and non-solar alike – are required to select a new rate plan by May 1, 2018. Only solar customers who were already commissioned, or in contract with APS by August 31, 2017, are exempt from this transition.

This guide will show you how to use the new APS service plan comparison tool to assess how the new rates will impact your energy bills.

Also included is a real world example of how solar can be used to help offset the pending rate increases.

aps
service plan compare

text size:

IMPORTANT: This plan comparison is calculated based on your historical energy usage, including your usage during our **previous** on-peak time-of-use hours of noon to 7pm, weekdays. The cost estimates **do not assume or reflect** any changes you might make to reduce your energy use during **the on-peak hours for our new time-of-use service plans, which are from 3pm to 8pm, weekdays**. Shifting your weekday energy use to before 3pm or after 8pm can help **reduce your monthly bill compared to the estimates** shown for the new time-of-use plans.
